

Treatment for Alzheimer's —

Cure for diabetes —

Cure for breast cancer —

Protection against cervical cancer —

**Medical research is the beginning of hope.** And today its promise has never been greater. But despite the considerable progress that's been made in new treatments and therapies, too many Americans still suffer from heart disease, asthma, depression, Parkinson's and other incurable diseases. We can change this – through significant, annual increases in federal funding for medical research. It's one of the best investments we can make in our future.

**Mr. President and Congress: Thank you for investing in medical research in the Recovery Act.**

**Please sustain the momentum with significant, annual increases in the NIH budget.**

**RESEARCH  
MEANS HOPE**

MORE FUNDING TODAY.  
MORE MIRACLES TOMORROW.
