VISION 2020 USA WORLD SIGHT DAY LUNCHEON BRIEFING

In recognition of World Sight Day 2019, Vision 2020 USA invites you to join us for an educational luncheon briefing on the promise of A.I., I.T., and big data for vision and eye health in the U.S.

Among the many aspects of our health, the eye is uniquely suited to the promise of artificial intelligence and big data. These dynamic fields of research are discovering solutions to long standing challenges for our nation's vision and eye health.

At this briefing, you will hear from a leading national figure in A.I. and big data research about where the field is headed. Dr. Chiang will also discuss the importance of federal leadership to ensure that the full potential of these exciting new technologies is realized for all Americans.

Speaker: Dr. Michael Chiang, MD, Professor of Ophthalmology & Medical Informatics and Clinical Epidemiology, Edwin and Josephine Knowles Professor, Biomedical Informatics Graduate Program, Associate Director of the Casey Eye Institute, Oregon Health and Science University

Moderated by Dr. Mitchell Brinks, MD, MPH, Chair of Vision 2020 USA

* If released by World Sight Day, we will include an update on the World Health Organization's much anticipated **World Report on Vision**

RAYBURN HOUSE OFFICE BUILDING, ROOM 2075 October 17, 2019, 12:00 PM – 1:00 PM

R.S.V.P. to Dina Beaumont, (202) 407-8325, dinabeau@aol.com

Thank you to the following members for their generous sponsorship of this briefing
